COMPY ($COMPY) Whitepaper

Version 1.1 — April 2025
Blockchain: Solana
Launch Platform: pump.fun

1. Introduction

Welcome to COMPY, the meme coin born from our love for computers and technology. In a world driven by silicon and code, COMPY pays tribute to the machines that power our lives. At its core, COMPY is a lighthearted and viral homage to everything digital — represented by a charming, old-school computer character with a brown hat and a friendly face glowing on the screen.

2. Vision & Mission

Vision

We envision a meme token that celebrates tech culture while entertaining the crypto space. COMPY isn't just another meme — it's a tribute to our computer-driven world, immortalized on the Solana blockchain.

Mission

Our mission is to grow COMPY into a community-led movement where humor, nostalgia, and innovation collide. We want COMPY to be instantly recognizable, widely shared, and part of every tech-savvy degen's wallet.

Tokenomics

Token Name: COMPY
Ticker: $COMPY
Total Supply: 1,000,000,000

Launch Mechanism:
$COMPY was launched 100% through pump.fun, a fair-launch bonding curve platform.
No tokens were pre-allocated, reserved, or distributed to insiders. Everyone – including the team –
acquired tokens via the open market like any other participant.

Initial Market Distribution (via pump.fun):

Category	Percentage	Notes
Liquidity (pump.fun)	100%	Fair Launch!
Community / Airdrop	15%	Purchased Post-launch
Development	10%	Purchased Post-launch

> Note: These distributions are indicative of post-launch purchases and are not pre-allocations.

Community-Owned Distribution of $COMPY (Post-Launch)

Community Growth & Incentives (purchased)   15%   75% Open Market

Development & Ecosystem (purchased)   10%

Taxes:
There are no buy/sell taxes.
Note: pump.fun applies a 0.5% interaction fee for anti-bot protection.

Vesting:
No vesting schedule. All tokens are live and circulating. Team-related wallets are public and fully
transparent.

4. Blockchain & Technology

Blockchain: Solana

Launch: pump.fun

Liquidity Lock: Handled via pump.fun bonding curve

Raydium Migration: Automatic after reaching ~$50K market cap

Ownership: pump.fun model (no centralized owner)

5. Roadmap

Q1: Launch & Meme Explosion

Engagement: Airdrops, giveaways, AMAs, contests

Viral Strategy:

Leverage nostalgia & computer culture memes

Create shareable AI-generated meme content

Launch weekly challenges & incentives

7. The Team

COMPY is brought to life by a small but dedicated team of five:

Founder & Developer: Tech expert (background in computer science)

Community Manager: Connects the project with the people

Designer: Responsible for the COMPY brand and visuals

Community Moderator: Community support & safety

Raider: Focused on viral spread and marketing waves

8. Security & Trust

Liquidity: Initially provided via pump.fun, bonded to vault

Ownership: Renounced-style via pump.fun — no centralized control

Transparency: All allocations and movements will be tracked and published

9. Final Words

COMPY is more than a meme — it's a movement. It's a reminder that behind every meme coin, there's a story — and ours is made of bits, bytes, and humor. Whether you're here for the tech nostalgia, the community vibes, or just the memes, COMPY welcomes you.

Let's build the most technically bullish meme coin the world has ever seen.
